

D&J Eco & Net Zero Policy

At D&J, we recognise the impact the construction industry has on the environment and the responsibility we have to build better. We are committed to reducing our carbon footprint, improving energy efficiency in the homes we deliver, and supporting the transition towards a low-carbon future.

Our aim is to provide building solutions that not only look great and perform well, but also minimise environmental impact and help our clients move closer to net zero living.

Our Commitment

- Reducing carbon emissions across our operations and projects wherever possible
- Supporting sustainable building practices and modern energy-efficient construction methods
- Minimising waste and maximising reuse and recycling on all sites
- Working with suppliers and subcontractors who share our sustainability values
- Helping clients make informed decisions about sustainable materials and technologies

Sustainable Building Practices

- Energy-efficient refurbishment and retrofit solutions
- Sustainable extensions and renovations designed to reduce long-term energy demand
- Installation of low-carbon technologies such as air source heat pumps, MVHR systems, solar PV and underfloor heating
- Improved building fabric performance through insulation, airtightness and thermal bridging reduction
- Use of responsibly sourced and sustainable materials wherever practical

Waste Reduction & Recycling

- Planning works carefully to avoid over-ordering and unnecessary disposal
- Segregating waste on site to maximise recycling
- Reusing materials where possible and safe to do so
- Working with licensed waste carriers to ensure responsible disposal

Responsible Procurement

- Prioritising local suppliers to reduce transport emissions
- Choosing materials with recycled content or low embodied carbon where possible
- Avoiding unnecessary plastics and packaging where alternatives are available
- Encouraging manufacturers and suppliers to provide transparent environmental information

Continuous Improvement

- Staying informed on evolving sustainable construction standards and technologies
- Reviewing our practices regularly to reduce environmental impact
- Training and upskilling our team where needed
- Working closely with clients, architects and consultants to deliver smarter, greener outcomes

Our Vision

We believe that better building isn't just about quality craftsmanship — it's about building homes that are efficient, future-proof, and built to last.

By making sustainability part of every decision, we aim to support our clients in creating homes that are comfortable, cost-effective to run, and kinder to the environment.
